INTRODUCTION.

IN presenting to the public a new addition of the Guide to the Fishing and Hunting Resorts, in the vicinity of the Grand Trunk Railway, revised and corrected for the year 1890, a few words may not inappropriately be added in explanation of the same. The plan of the Guide may be described as a condensation of reports received from the Company's agents who were asked to furnish the names of hotels in their vicinity and their charges, also the cost of livery; the nearest favorable fishing resorts and their distance; fish to be obtained, and varieties most plentiful; best months; baits used; names of guides and charges, and cost of boat hire. For hunting—the best grounds and distance; game most abundant; best months; guides and their charges; whether dogs are obtainable, and a general description of the country. From these the best reports were selected and are printed in a brief form in the order of the questions as above stated. Although subject to change in the course of the season, the information may be generally accepted as reliable, and it is hoped will be a useful assistance to sportsmen or tourists in laying out a plan for their summer tour.

A glance at the maps on the cover will show that the Grand Trunk occupies an exceptionally good geographical position, and reaches many of the finest and most popular resorts of the Dominion of Canada, frequented by tourists and lovers of the rod and gun. Starting from the east from Portland on the Atlantic Coast, or the ancient city of Quebec, past which flows the tide of the Gulf of St. Lawrence, the line follows the course of the Majestic River St. Lawrence, for nearly four hundred miles. Thence passing in close proximity to the Thousand Islands, and along the northern shore of Lake Ontario, the traveller arrives at Toronto. Here the numerous lines and branches of the road offer exceptional opportunities for visiting some of the well known Inland seas, for which this continent is celebrated. A short trip to the south, either by rail or steamer, takes the passenger to the goal of all enthusiastic lovers of nature, Niagara Falls. A few miles further travel and we arrive at the shore of Lake Erie. To the west we have Lakes Huron and St. Clair, etc., to the north, the Georgian Bay, where may be seen that wonderful Archipelago of over twenty-seven thousand islands, of all

conceivable sizes and shapes, which, once beheld, will never be forgotten.

Where nature has provided so bountifully, it is difficult to particularize, but for the information of those who desire to enjoy a sporting season in the Dominion of Canada, a brief explanation is added, showing

How to reach

some of the localities which are specially recommended to the enthusiastic sportsmen.

The Androscoggin Lakes

are well known to the residents of New England, with whom they will long continue to be a favorite camping locality. They can easily be reached from New York by the various Sound steamer lines to Boston, and thence by Boston and Maine R.R., and Grand Trunk Railway, through Portland to Bryants Pond or Bethel, where connection is made with the various stage and steamer lines for all parts of the Lake Region. Round trip tickets at specially low fares are issued at all principal points in New England, and an excellent service of through cars is provided during the summer season. Intending visitors should send to Capt. C. A. J. Farrar for a copy of a book entitled the "Androscoggin Lakes Illustrated," published by the Androscoggin Lakes Transportation Co. at Boston. This contains a full description of the various routes, fares, and best mode of transportation.

The Lake St. John Region,

the home of the ouananiche or *fresh water salmon*. The trip to this new and interesting territory, recently brought into prominence by the opening of the Quebec and Lake St. John Railway, is one of unusual interest, and the following are a few of the routes especially recommended.

FROM NEW YORK.—By New York Central and Delaware and Hudson Ry's., or by New York Central, or New York, New Haven and Hartford and Central Vermont routes to Montreal, Grand Trunk Railway or Richelieu & Ontario Navigation Co., to Quebec, and Quebec and Lake St. John Ry., thence to destination.

Also by Sound Steamers or Railroad lines to Boston or Worcester, Boston & Maine R.R. to Portland, Grand Trunk Ry. to Quebec, and Quebec and Lake St. John Ry.

Additional routes through White Mountain to Groveton or Sherbrooke, and thence by Grand Trunk Ry. to Quebec.

FROM BOSTON.—By Steamer or Boston & Maine R.R. to Portland, and Grand Trunk Ry. to Quebec, or Boston & Maine and Central

Vermont R.R. to Montreal and Grand Trunk Ry., or Richelieu & Ontario Nav. Co. to Quebec.

FROM CANADA.—By Grand Trunk Ry. to Quebec, with optional privileges of Richelieu and Ontario Navigation Co.'s Steamers between Toronto and Quebec if desired.

New and elegant hotels have been opened at Roberval, Chambord Junction, Lake Edward, Lake St. Joseph, etc., where ample accommodation, and all necessary sportsmen's equipment can be procured. Interesting particulars as to the resources of these points of interest will be found in the list of places in the Province of Quebec, or special information will be furnished on application to the General Passenger Agents of the Grand Trunk, or Quebec and Lake St. John Railways.

Lake Temiscouata and

The Salmon Rivers of Quebec and New Brunswick are also reached through Quebec, by nearly the same routes as the Lake St. John Region, with the exception that steamers or Intercolonial Ry. must be taken eastward from the Ancient City.

Stoney Lake, Rice Lake, Lake Couchiching,

are easily reached from various points on the main line, or branches through the Midland District.

The Muskoka Lakes

are a beautiful range of waters, adjoining one another for a distance of about fifty miles. They are situated at an altitude of 750 feet above the level of Lake Ontario, and are especially commended for the abundance of animal and vegetable life to be found in their neighborhood, whilst the waters are filled with the choicest varieties of the finny tribes. The steamers of the Muskoka and Georgian Bay Navigation Company make daily trips from Gravenhurst, and passengers have the privilege of stopping over or going all around the lakes, according to their inclination.

The following will give an idea of the different routes :

FROM NEW YORK STATE, PENNSYLVANIA, ETC.—By the various Railroad routes to Suspension Bridge (Niagara Falls), and thence by Grand Trunk Railway to Muskoka Wharf, and Muskoka & Georgian Bay Navigation Co., to the various ports on the Lake, or from Niagara Falls to Toronto by Steamer, and thence by Grand Trunk Railway, &c.

FROM MICHIGAN, INDIANA, ETC.—By any route to Detroit or Port

Huron, Grand Trunk Ry. to Muskoka Wharf and Muskoka and Georgian Bay Navigation line to destination.

FROM CANADA.—By Grand Trunk Ry. to Muskoka Wharf and thence as above.

A brief extract from an article in *The American Angler*, will give an idea of the pleasure to be derived from a visit to this portion of the Dominion.

"Thousands of devotees of rod and reel are unaware of the splendid fishing which can be had in the regions north of Lake Ontario and east of Georgian Bay, everywhere traversed by the Grand Trunk Railway of Canada. Simcoe, Couchiching, Muskoka, Ah-mic, Storey, Nipissing and many other lakes lie upon this route, each noted for sport, first-class both as regards abundance and variety of fish in the streams. The Severn, Muskoka, Maganetawan, French, and other rivers drain an immense territory, and as the country is only partially cleared and settled, every reach of water is alive with brook trout, white bass, pike, perch, mascalonge and other kinds are found in great plenty. Charges at hotels and for guides are cheap, and attention is given to sportsmen. The writer of this, in a single day, caught in the Maganetawan River, the last week in July, this year, ninety-seven trout in a single afternoon, the largest of which tipped the scales at two and a quarter pounds. There were then no black flies or mosquitos, and poisonous snakes are unknown. Partridges and quail are almost as thick as blackbirds in a swamp, while deer and bear abound, and beaver, fox, and other fur-bearing animals are plenty. The Grand Trunk railway furnishes every accommodation to those sportsmen who pass over it. Conductors and trainmen are diligent and obliging, and, taken all in all, a trip to the portion of Canada referred to can be depended upon to furnish solid enjoyment for each day of twenty-four hours. The heat of summer has no terrors when, as there, frost killed potato vines to the ground on the 13th of July!"

Parry Sound Region.

The route to this territory is nearly the same as to the Muskoka Lakes, except that passengers use the Grand Trunk Ry. as far as Penetang or Midland to join the steamers of the Muskoka and Georgian Bay Navigation Company, or to Collingwood for Steamers of the Great Northern Transit Co.

Lake of Bays (Muskoka).

This interesting place is now rapidly coming into prominence, situated as it is in the heart of the hunting grounds of Muskoka. It is reached by Grand Trunk Railway from any point to Huntsville, thence by steamer over the beautiful waters of Fairy and Peninsular Lakes to the Fraser House (Glassmere, P. O.) Here a small portage occurs by Omnibus or Team, to connect with the Lake of Bays Steamer. The Port Julian House (Baysville, P. O.), McCutcheon House, Maple Valley (Dwight, P. O.), the Jelley House, Norfolk House, Baysville, Goldie House, Dwight, etc., offer ample accommodation to Tourists.
